FOR IMMEDIATE RELEASE

Massive Networks Enters Colocation Agreement with Colo Atl

ATLANTA, December 6, 2016 – [Colo Atl](#), the leading provider of carrier-neutral colocation, data center and interconnection services at 55 Marietta Street in Atlanta, GA, announces today that [Massive Networks](#), a provider of enterprise class data transport solutions across the entire US domestic carrier ecosystem and to 181 countries worldwide, has established a new Point of Presence (PoP) in Colo Atl's downtown Atlanta facility. The company selected Colo Atl for its strategic location and outstanding reputation for reliability, flexibility and premium customer service. Colo Atl provides Massive Networks with critical access to a roster of more than 90 network operators and service providers, with no monthly recurring cross connect fees inside the Colo Atl MMA.

“Colo Atl provides an extremely tactical location for Massive Networks to provide services throughout the southern US,” states Massive Networks CEO/CTO, Paul Mako. “The difference between Colo Atl and its competitors was the fact that they were flexible and dedicated to meeting our specific needs. We’re bringing a new concept in network management to the southern US and the heavy concentration of network providers in the Colo Atl facility provides Massive Networks with immediate access to an additional 500,000 fiber lit buildings.”

The colocation deal with Colo Atl enables Massive Networks to provide a new class of managed networking solutions through Layer 2 circuits in addition to transitional Layer 3 connections, across the southeast. Massive Networks features its [One Pipe Multi-Connect](#) solution that allows individual companies, as well as vendors, to combine multiple services through a single pipe creating greater cost-efficiency while improving network performance and security.

“I’m pleased to welcome Massive Networks to the Colo Atl tenant roster,” adds [Tim Kiser](#), Owner and Founder of Colo Atl. “Massive Networks brings a valuable service and innovative spirit to the Colo Atl tenant roster. I’m thrilled to provide a strategic base from them to expand their reach and offer the products and services that are driving businesses today.”

Founded in November 2001, Colo Atl provides a reasonable, accommodating and cost-effective interconnection environment for more than 90 local, regional and global network operators. In 2016, the company is celebrating its 15-year anniversary of providing service excellence and growth.

In 2016, Tim Kiser and Colo Atl were nominated for the Atlanta Telecom Professionals Technology Service Provider Award. Colo Atl was the winner of the 2016 TMT Award for Best Colocation & Data Center – Georgia.

About Colo Atl

[Colo Atl](#), a JT Communications company, is the leading provider of carrier-neutral colocation, data center and interconnection solutions at 55 Marietta Street in the global telecom hub of Atlanta, GA. Colo Atl provides superior carrier-neutral colocation, data center and interconnection services at an affordable rate. Colo Atl is a carrier-neutral environment that allows all types of network operators to securely and conveniently cross connect within a SSAE 16 certified facility. Colo Atl has no monthly recurring cross connect fees between tenants and provides exceptional customer service.

Colo Atl is also home to the Georgia Technology Center (GTC), a live laboratory for network equipment vendors to highlight their optical and electrical hardware and operating systems, and the Southeast Network Access Point (SNAP), which provides next-generation Internet Exchange (IX) solutions, including SDN peering, testing, collaboration and implementation.

About Massive Networks

Massive Networks provides enterprise class data transport solutions across the entire US domestic carrier ecosystem and to 181 countries worldwide. Our blended managed network delivers high speed Internet and private line connections to 1.5 million fiber-lit buildings, data centers and cloud providers nationwide.

Massive Networks' services revolve around two general solution sets: Massive One Pipe Multi-Connect Networks and Fully Managed Network Services. We build custom designed networks for each customer using our blended network approach of Layer 2 and Layer 3 network technologies. This revolutionary technology design offers customers multiple and dynamic streams of data through a single pipe, providing superior performance and value from bandwidth intensive services like voice, data, web services, video, and backups all on a single handoff from our fiber backbone.

Headquartered in Boulder County, Colorado with data centers and offices throughout the United States, our Network Operations Center (NOC) engineers have years of experience navigating the Carrier Ecosystem and act as an extension of your IT team.

Massive Networks provides NNI (Network to Network Interface) to dozens of national carriers and Direct Peering Exchanges with Amazon Web Services, Google Cloud Platform, Microsoft Azure, Office 365 and more!
